Robert Lamb	Bring Your Own Patients: In-Office Implant Mentoring	Monthly Ongoing

Testimonials

"In over 20 years of practicing periodontics, I have never attended a course with more useful information on all levels. Dr. Tarnow brings valid scientific evidence into everyday practical patient care of the highest level"

Leslie Horn, Periodontist, Lexington, KY

"It is a simple fact that the 3 courses I have attended at IDEA are the only ones having had the effect of significant change in my subsequent clinical practice. After 22 years in periodontics, this is even more so again with Prof. Cortellini's course on regeneration. All is now clear and simply cannot wait to radically change my clinical approaches to different advanced problems."

Jean-Pierre Lacroix, Periodontist, Dieppe, NB, Canada

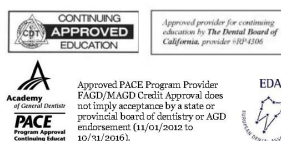

"The venue of IDEA is a combination of facilities and teaching is absolutely state-of-the-art; Ziv Mazor's course provided literally hundreds of practical concepts to predictable bony regenerate bone, sinus elevation, implant placement and temporization based on a career of surgical innovation. Truly an exceptional course!"

Lloyd Nattkemper, Periodontist, Monterey, CA

"Bob Lamb's implant class was truly the best experience I have had for dental CE. As a result, I have simplified my implant procedures by 30 - 40%; all with tons more confidence. I have been placing implants since 2005 and attending lots of CE to hear all the 'big names'. I wish I had attended this course at IDEA in 2006! instead of 2015."

IDEA Course Schedule 2019 - 2020

Surgical Courses

The course paid for itself in the first week back in the office with nothing else but peace of mind and the ability to offer the highest level of care to my patients."

Lee Baker, General Practitioner, Fort Bragg, CA

"This is by far the best CE course that I have taken. If you are passionate about dentistry and have the desire to bring your skill to the higher level than this is the course for you. Dr. Khoury and the rest of the instructors presented all the concepts of bone and soft tissue grafting in a very succinct and practical manner. Very well done. I will be sure to return for other courses."

Richard Aguila, Periodontist, Jacksonville, FL, United States

"The opportunity to place implants under the guidance of this experienced surgeon and outstanding teacher, makes my professional life so much easier and more enjoyable. The "Lamb mentorship" program is inspiring and practice changing. It has made my practice far busier and even more successful."

Miles Guyton, General Practitioner, San Jose, CA

"This is the fourth course I have attended. Without exception, the courses have been excellent. The presenters have been excellent as have been their presentations. The material was immediately able to be integrated into my practice. The small class size allowed close interaction with the speaker, but also of benefit was the availability of time to discuss cases with the other attendees."

William Lubken, Periodontist, Gig Harbour, WA
