“The information provided to us here at IDEA by Prof. Sato is UNIQUE.

I consider myself as one of the few lucky professionals who had the opportunity to attend Dr. Sato's course. It gave us a completely new perspective on how we should all diagnose and treat our patients. After 21 years of private practice this course made me feel professionally regenerated.

Dr. Sato teaches the occlusion and function oriented orthodontics in relation to the craniomandibular system. A very accurate diagnosis, based on condylograph, cephalometrics, and all these information transferred to articulator mounted casts is included in this course.

Once you step into it, I'm sure it will help you to set the standard of dental service you provide to the highest possible level!”

- Petros Kokkinos, Orthodontist, Limassol, Cyprus

“As a maxillofacial surgeon, I am so impressed - after all the cases that I have done with orthognathic surgery, to see what is possible to treat with orthodontic treatment only. It's a miracle. I will change my way of practice and that will help a lot of patients.”

- Quang-Phi Tran, Maxillofacial Surgeon, Ho Chi Minh City, Viet Nam

“Dr. Sato is a wealth of knowledge and it was an honor to attend this program. From start to finish everything was first class: the quality of the faculty, the food, and hospitality; and the educational experience is unique.”

- Ian Tester, General Practitioner, Ontario Canada

“No matter where you are in your career, you absolutely cannot miss this course. It is amazing how much information one can get in just six days. I'm really grateful and happy that I was able to come here and I will definitely recommend this amazing place to my colleagues.”

Victoria Brishten, Orthodontist, Noginsk, Russia
